

Project 167 Synopsis

Background

Love Environmental was contracted in the spring of 2009 to identify potential sources of funding that the CIF could leverage to assist with financing CIF supported projects. Emphasis was placed on exploring funding for projects resulting from the joint CIF/SO RFP Blue Box Plastics Recycling Enhancement Initiative. The project also included identifying and contacting key representatives within those funding agencies.

Results

The project identified and evaluated several potential funding sources, chief of which was the federal Sustainable Development Technologies Canada which ultimately provided funding to one of the RFP proponents (Entropex). The project assisted in raising awareness of the CIF and developing important relations with key federal and provincial agencies including the Premier's office, Ministry of Energy and Infrastructure and Ministry of the Environment. The project was completed in May 2009 at a cost of under \$2,000.
