## B. PROJECT REQUIREMENTS

### 1.0 INTRODUCTION

Loyalist Township is requesting proposals from qualified firms for the provision of curbside collection services of recyclable material starting July 1, 2013.

Unit prices are required for three day per week collection (Tuesday – Thursday). Also the collection schedule requirements are detailed in section B.5

RFP submissions must be from firms or companies that are qualified Contractors as set out in this RFP. The Proponent must be capable of entering into a Contract for the term identified in this RFP and for the provision of complete services required and as set out in this RFP.

## 2.0 PROJECT COSTS

The Price Proposal Schedule C must include all costs in Canadian dollars and exclude HST. HST is extra and must be shown as a separate line item on all invoices.

In the event of any discrepancy between any unit price and an extension, the unit price shall govern.

### 2.1 Consumer Price Index Adjustment

Unit costs will be adjusted on July 1, 2014, and again on each subsequent July 1st during the life of the contract. The adjustment will be equal to the percentage change from the previous year of the average annual "Special Aggregates: All-Items Excluding Energy" Consumer Price Index for Ontario as published by Statistics Canada for the preceding year.

### 2.2 Fuel Cost Adjustment (FCA)

The Township will make a Fuel Cost Adjustment (FCA) to the monthly payment owed the contractor to compensate for fluctuations in the price of diesel fuel, based upon changes to the Ministry of Energy Diesel Fuel Price for Ottawa (DFP-O) averaged for the month as published on the Ministry website at:

<http://www.energy.gov.on.ca/en/fuel-prices/fuel-price-data/?fuel=dsl&yr=2013>

An FCA per litre of diesel fuel will be made each month when the DFP-O for the month differs by more than five (5) cents per litre from the DFP-O for January 2013 as follows:

1. When the DFP-O differential is equal to or less than five (5) cents per litre there will be no FCA for that month;
2. When diesel fuel prices rise more than five (5) cents per litre as per the DFP-O, the FCA per litre will be the DFP-O for the month being invoiced less that for January 2013, less five (5) cents, paid with the monthly payment;
3. When diesel fuel prices fall more than five (5) cents per litre as per the DFP-O, the FCA per litre will be the DFP-O for the month being invoiced less that for January 2013, plus five (5) cents, withheld from the monthly payment.

For the purposes of the calculation of the FCA, the contractor must provide, with their monthly invoice for payment, detailed diesel fuel consumption figures for the previous month.

The FCA will be calculated using the following formula:

$$FCA = DFC \times (DFP-O(m) - DFP-O (\text{January 2013}))$$

FCA = fuel cost adjustment

DFC = diesel fuel consumption

DFP-O (m) = diesel fuel price in Ottawa for the month being invoiced

DFP-O (January 2013) = base diesel fuel price for January 2013

Examples:

$$DFP-O (\text{October 2012}) = 130.0$$

$$DFC = 10,000 \text{ litres}$$

$$(1) \text{ if } DFP-O (m) = 136.5, \text{ then } FCA = 10,000 \times (136.5 - 130.0 - 5) / 100 = \$150$$

$$(2) \text{ if } DFP-O (m) = 123.5, \text{ then } FCA = 10,000 \times (123.5 - 130.0 + 5) / 100 = (\$150)$$

### 2.3 Collection Payment

The contractor will invoice the Township on a monthly basis for all recyclable materials collected as measured by the incoming weights on the MRF's weigh scale.

### **3.0 BACKGROUND OF THE PROJECT**

At present the Township collects blue box and grey box recyclable material from two geographic areas. On Week 1 in one day, the blue box is collected in the "North and East Sections" (NE) and the grey box is collected in the "South Section (S)". On Week 2 in one day, the blue box is collected from the S Section and the grey box is collected from the NE Section. This system continues every week throughout the year. These materials are delivered to the Kingston Area Recycling Centre Material Recycling Facility (KARC MR) located at 198 Lappans Lane in the City of Kingston. The Township requires that this schedule be implemented for July 1, 2013

### **4.0 AVAILABLE TOWNSHIP RESOURCES**

The Township will be responsible for the supply, maintenance and replacement of recycling boxes and carts. No other Township resources except those set out herein should be assumed available in the formation of any bid. The Township will advertise schedules at its own discretion.

### **5.0 OBJECTIVES**

The objective is to contract a company over the term specified for the curbside collection and transportation of recyclable material in accordance with the terms of this RFP.

#### **5.1 Scope of Collection**

Collected materials must be evenly spread based on volumes from Tuesday to Thursday and blue box materials collected one week and grey box materials collected the next week. The Recycling Collection schedule will be revised to match the existing solid waste collection schedule. On Tuesdays, recycling will be collected in the "South Section"; on Wednesdays, recycling will be collected in the "North Section"; and on Thursdays, recycling will be collected in the "Central Section". (See Appendix "A" for maps of sections) In addition to the curbside collection, the collection includes 96 gallon European Style Lift wheeled carts for multi-unit residential buildings generally with 25 or more units. This is a significant change from the current practice and a public education program by the Township must be implemented well in advance of the start of collection on July 1, 2013.

In addition, the materials will be delivered to KARC MRF for the duration of term of this contract. The City may decide to change the MRF location. Should the Township decide to change the MRF delivery location, any changes to this collection contract will be negotiated between the Contractor and the Township. One year notice is to be provided from the City for any changes.

This Request for Proposal includes the collection of recyclable materials as accepted by KARC.

#### **5.2 Contract Supervision by the Contractor**

The Contractor shall have on duty at all times, sufficient and qualified Supervisors to properly direct the Work, each having a telephone and two-way radio-equipped vehicle so as to ensure a courteous, prompt and efficient service for handling complaints. These vehicles will be equipped to pick up missed recyclable materials.

The contractor will have the ability to determine routes for collection in order to maximize collection efficiencies, as long as the routing covers each eligible household, and as long as the scheduled days follow the specified 3 days.

Maps identifying the number of residential units per property are attached as a separate file in Appendix "A".

Changes to existing routes will be advertised by the Township at the beginning of the Contract. If changes are made at other times, all affected properties must be notified by the Contractor.

At least 90 days prior to the commencement of the Contract, the Contractor will submit to the Township detailed maps and schedules showing each truck, the starting time and point for each truck, the route for each truck and the finishing time and point for each truck. The individual Collection Routes and Collection Days will not be changed during the contract without prior written approval of the Township.

There are several private roads where residents take recycling boxes to a common point for collection. They are identified in Appendix "A".

#### **5.4 Collection Vehicles and Equipment**

The Contractor shall provide all necessary vehicles and miscellaneous equipment including radio communications and furnish all necessary labour, materials, fuel, tools, licenses, airtime and all other incidentals so that the Contract and all work required to be done under it, can and will be carried on in an efficient and effective manner continuously and expeditiously to completion, in all respects to the satisfaction of the Township.

The Contractor shall supply new primary collection vehicles at the commencement of the Contract term for the duration of this Contract. If a delay in delivery of new vehicles occurs, the Contractor may provide interim service with used vehicles for a period not to exceed six months. In the case of the use of used/alternate vehicles for interim provision of service, the Contractor shall provide copies of Ontario Safety Standards Certificates for all vehicles utilized to the Township at the Township's sole discretion. The Contractor shall further, during the term of the Contract, provide copies of their Ontario Safety Standards Certificates resulting from annual vehicle inspections for any and all vehicles utilized for the provision of Services under this Contract to the Township at the Township's sole discretion.

The vehicles to be used for the performance of the Work as herein described shall have fully enclosed bodies of sufficient capacity and strength, capable of loading and unloading mechanically all materials, and mounted on an adequate truck chassis.

Recyclable Materials may be compacted up to a rate of 2:1 to be accepted at the Township's designated receiving facility(s). Over compaction may result in the rejection of the load by the MRF. Should the MRF determine that an entire load is unacceptable before tipping, the Contractor shall not tip the load but remove it for disposal. Any tipping fees associated with rejected loads for any reason including over compaction or contamination will be the responsibility of the Contractor. Any and all communication regarding load contamination and load rejection will occur between the Contractor and the Township representative only and between the Township representative and the MRF processing Contractor only. The Township has, in its sole discretion, the right to undertake audits of inbound loads received at the MRF and in its sole discretion shall determine acceptable contamination levels of loads to the MRF.

All vehicles supplied under the Contract shall meet the provisions of the *Canada Motor Vehicle Safety Act* and the Regulations made hereunder, be licensed by the MTO and meet all applicable safety regulations.

All Equipment shall be equipped with all mandated and/or legislated safety equipment. All collection vehicles shall be equipped with a revolving yellow caution light mounted on the rear of the vehicle and a back up warning device (at a minimum). Vehicles in excess of twenty (20) feet in length are

The Contractor shall stencil a numbering system on the collection vehicle to identify the vehicle and accommodate the necessary accounting system for loads entering designated facilities. Any additionally used collection vehicles, which may be required from time to time to provide Services under this Contract will also require a similar system of numbering.

The Contractor shall stencil the Certificate of Approval/ Environmental Compliance Approval number issued by the Ministry of Environment on all collection vehicles.

The Township may also require permanently affixed signs/decals/graphics proclaiming messages of public interest, or to promote any aspect of the recycling program being carried on by the Township. Brackets allowing temporary signage to be affixed and changed as deemed necessary may also be required. Such costs are to be borne by the Township and implementation arranged cooperatively by the Township and the Contractor.
