

CIF Project # 869 – StewardEdge Price Sheet Upgrade

Background

The project took place in two phases. Phase 1 involved contracting with Reclay StewardEdge (RSE) to continue production of the Ontario Price Sheet for the balance of 2014. During this time, RSE worked with CIF and participating municipalities to provide updated and improved content of the price sheet.

Phase 2 produced two online versions of the price sheet, one similar to the existing price sheet for public posting and a second version that included weighted averages of prices and additional statistical data as a resource for participating municipalities with restricted access online. Information in both versions of the price sheet would be the property of municipalities.

Summary of Results

The CIF Price Sheet continues to be a monthly publication that contains a blend of municipal spot market prices for Ontario-based municipalities. It details current and price trends for post-consumer metals, glass, plastic and fibre and is an invaluable tool for municipal officials and others involved in the recycled commodities marketplace. The price sheet can be found online at thecif.ca/cif-price-sheet.

Financials

RSE had applied for funding under the Centre of Excellence to continue the Ontario Price Sheet for a span of 18 months from July 2014 to the end of December 2015. The total cost of the project was \$36,253.66.
