

CIF Project #438 – Project Support

Background

The CIF hired The Emerald Group for support on developing project applications for the City of Temiskaming Shores (Project #436) and the City of Kenora (Project #413), as well as editing various other project reports.

Summary of Results

The Emerald Group assisted in the development of applications and final reports for projects in Temiskaming Shores and Kenora, as well as Chatham-Kent.

Financials

The final cost for this work was \$5,253.

Learnings

Many municipalities were willing to make changes to their programs but lacked the internal resources to undertake the calibre of work the CIF sought to fund. Providing additional assistance resulted in better quality applications, improved the success rate of applicants and reduced the net cost invested by CIF staff and stakeholders.
